**Best Times: Mon. - Thurs. | 11am - 4pm
Sat. - Sun. | 11am - 2pm*

IN THE SPOTLIGHT

PET OBESITY The Facts

Obesity is the most common preventable disease for dogs and cats in North America. The Association for Obesity Prevention reports over 50% of cats and dogs are overweight.

Obesity shortens your pet's life and increases their likelihood of developing disease. It was previously believed that heavier dogs lived shorter lives than their leaner counterparts by about 6-12 months.

However, a large lifetime study of Labrador Retrievers has found that being overweight, even by a moderate amount, can reduce a dog's life expectancy by nearly 2 years.

Dogs and cats living with obesity develop an increased risk for cancer, diabetes, heart disease, hypertension, osteoarthritis and faster degeneration of affected joints, urinary bladder stones, and anesthetic complications.

Keeping to a strict diet and routine will help increase your pet's lifespan and well being, making for happy humans and fur friends alike!

ACUPUNCTURE + REHABILITATION

DR. GRIFFIN HAS TAKEN REHABILITATION TO A NEW LEVEL!

Our former lobby is now a closed space dedicated to holistic healing treatments.

You may hear us refer to this as the 'acupuncture room' but it is so much more!

Dr. Griffin works with a multitude of tools, including our new treadmill, to aid in balance, comfort and coordination.

Pet Talks with DR. GRIFFIN!

LET'S TALK:
*Pet Wellness &
Preventative Care*

Seven Fields Veterinary Hospital
WHEN:
Spring dates coming soon!

Doors open at 7 pm with the chance to win prizes!

FEATURED NEWS

We are now seeing Exotics!

Dr. Griffin, Dr. Bonzo, Dr. Firestine and Dr. Goncz will be seeing pocket pets such as guinea pigs, hamsters, rabbits and ferrets.

Dr. Bonzo and Dr. Firestine will also be seeing snakes and other reptiles.

Contact us to schedule an exam!

THANK YOU

It is our privilege and pleasure to care for your pets!

Did you know...
Originally it was thought that Egyptians domesticated the cat, but in 2004, archaeologists discovered a 9,500 year old cat grave in Cyprus. This makes this the oldest known pet cat – predating Egyptian art about cats by over 4,000 years!
